Website Planning and Design Document

This document serves and the planning and design documents for the personal Website Project.

Planning

I want to take the opportunity to create a website that showcases my personal hobby, miniature wargaming, and display some of the different hobby activities that I participate in.
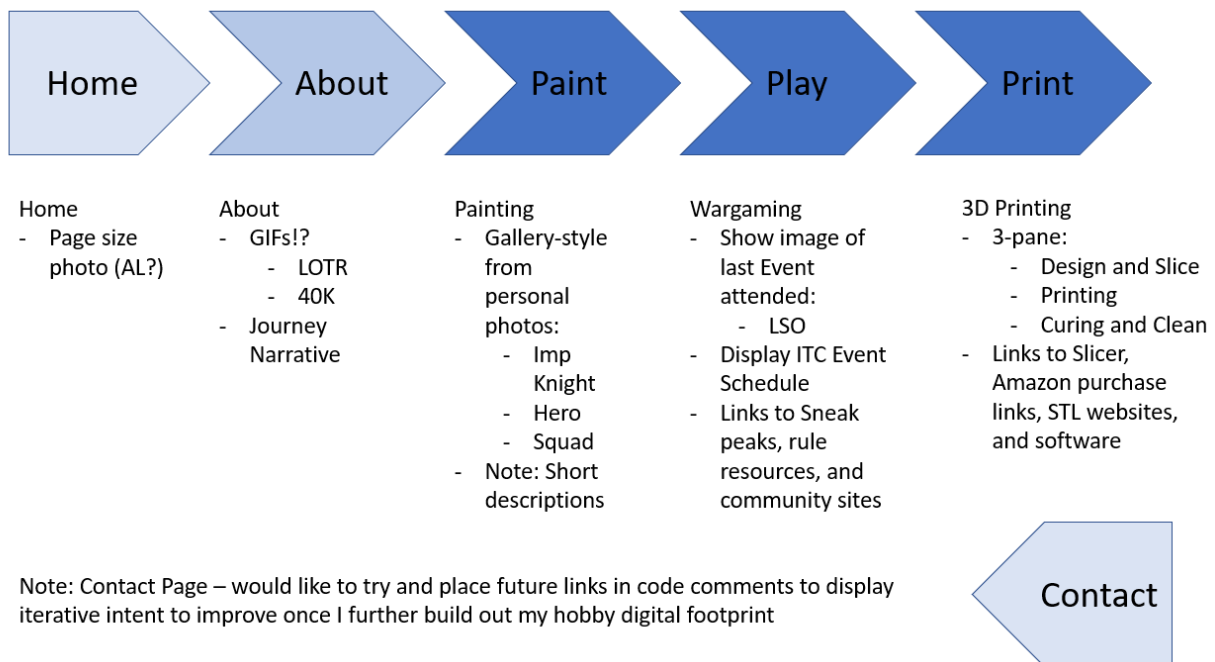

Objectives:

1. Create a professional and uniform style website
2. Provide an introduction page that details my journey with some sort of digital media from genres that I enjoy
3. Showcase personal painting projects in a gallery page
4. Display a gaming/event page with helpful resources
5. Catalog 3D printing activities and helpful resources
6. Build a contact page

The information displayed on the website should inform and guide anyone interested in similar hobby pursuits to be able to follow in my footsteps or gain inspiration on painting examples. This page is particularly focused to those interested in joining the hobby, those that are interested in following my progress, and those looking for additional information on events and 3D printing. As for the "why," I am passionate about what I do and just wanted to take an opportunity to present what I enjoy doing in my free time and to perhaps inspire others to continue/begin their own journey in the hobby!

Design

I began my design by looking at highlighted pages on the Course's Slack page. I particularly enjoyed the art examples, especially Kirby Horvitz's page at ([Link](#)). I saw another page's use of a pop-out menu from the left side of the website that was a close contender, displayed during class time. I ultimately decided to adapt the picture grid from Kirby's page, but started to change many of the style aspects upon experimentation with the code. For example, using Kirby's code and the W3 School resources, I went with Cinzel to capture the Gothic-style, thematic with the Warhammer franchise, for

headings and decided that Fauna One was great for the body text; Cinzel & Fauna was a pairing that I found when researching on W3Schools ([Link](#)).

Home ➤ **About** ➤ **Paint** ➤ **Play** ➤ **Print**

Home
- Page size photo (AL?)

About
- GIFs!?
    - LOTR
    - 40K
- Journey Narrative

Painting
- Gallery-style from personal photos:
    - Imp Knight
    - Hero
    - Squad
- Note: Short descriptions

Wargaming
- Show image of last Event attended:
    - LSO
- Display ITC Event Schedule
- Links to Sneak peaks, rule resources, and community sites

3D Printing
- 3-pane:
    - Design and Slice
    - Printing
    - Curing and Clean
- Links to Slicer, Amazon purchase links, STL websites, and software

Note: Contact Page – would like to try and place future links in code comments to display iterative intent to improve once I further build out my hobby digital footprint
